

ONLINE APPLICATIONS

Need to apply for certification or add an endorsement to your existing certification? Please visit www.asttbcapply.ca. Since Spring 2016 we began processing applications online. We will no longer accept paper-based applications as of January 2017 - please recycle or return to us any paper based applications you may have on hand.

FIRE PROTECTION WEBSITE

Check out the new and improved Registered Fire Protection Technician Website:

<http://fireprotection.asttbc.org/>

There's a MEMBERS ONLY section (Create a new account or use your existing ASTTBC log in credentials). Here you can view codes/standards, download forms and advertise your business (under "Service Providers"). Please check the website regularly for updates!

Provisional Status

To maintain consistency across the organization, we have introduced the "Provisional" Status in Fire Protection. Anyone with "Trainee" status in any endorsement should now refer to themselves as Provisional Registered Fire Protection Technicians (RFPT-P). Provisional members have a maximum of two years from the date of first being registered as a Provisional member to achieve the required work experience and or training. If you are a TRAINEE right now, you will receive a notification soon with a 2-year deadline to complete the requirements.

Water-Based Fire Protection Systems Endorsement

In early 2016 the Fire Protection Certification Board passed a motion to accept the Red Seal Sprinkler Fitter ticket as the educational prerequisite for the Water-Based Fire Protection Systems Endorsement.
